Experience

Full-Stack Developer, Ibotika Solutions Inc. *Laravel, Livewire, Filament* **Jan 2026 - Jun 2026**

- Built and enhanced clinic workflows for appointment scheduling, patient check-in, session management, and walk-in appointments, reducing manual steps for clinic staff.
- Developed invoicing, payment tracking, shift management, and Z-report features, improving daily transaction visibility and end-of-shift reporting.
- Implemented role-based dashboards, backend APIs, and database logic for appointments, payments, orthodontic records, and clinic operations.

Projects

AI-Powered Helpdesk & Ticketing System **Jul 2026**

- Developed a full-stack helpdesk platform using Python, FastAPI, PostgreSQL, and React with JWT authentication and RESTful ticket management.
- Built AI-driven ticket automation using Gemini API to automatically classify tickets, assign priority, categorize issues, and generate concise summaries.
- Implemented backend services with SQLAlchemy, Pydantic validation, authenticated ticket ownership, and structured database workflows.
- Planned Redis caching and background processing for asynchronous AI tasks, improved response times, and scalable ticket processing.
- Planned RAG-based knowledge retrieval for context-aware support responses using internal documentation and helpdesk knowledge sources.
- Utilized: Python, FastAPI, React, PostgreSQL, SQLAlchemy, Gemini API, JWT, Redis, Docker, REST API, Pydantic, Uvicorn, Git

Client Project Tracker **Dec 2025**

- Developed an authenticated full-stack project management system using Laravel, React, TypeScript, and Inertia, with RESTful CRUD for client projects.
- Implemented server-side search, status and priority filtering, due-date sorting, pagination, validation, and structured API responses.
- Integrated Redis caching for dashboard statistics with automatic cache invalidation after project creation, updates, and deletion.
- Built scheduled due-date notifications using Laravel Scheduler and queued database notifications for upcoming and overdue projects, with unread/read states and duplicate prevention.
- Utilized: PHP, Laravel, ReactJS, TypeScript, Inertia.js, MySQL, Redis, Tailwind CSS, REST API, Laravel Sanctum, Laravel Scheduler, Laravel Queues, Laravel Notifications, Eloquent ORM, Vite, Git

Restaurant Point-of-Sale System **Sep 2025**

- Developed a full-stack restaurant POS system with a Livewire cashier interface for product browsing, cart management, dine-in, take-out, and delivery orders, payment processing, queue numbers, and receipt viewing.
- Implemented reliable transaction processing using Laravel database transactions to create orders, transaction items, payments, and payment timestamps with rollback handling.
- Designed a relational MySQL database for products, categories, product options, transactions, transaction items, payments, cashier shifts, and Z-report records using Eloquent ORM.
- Built a Filament back-office panel for managing menu items and categories, reviewing transaction history, and viewing receipt details through searchable and sortable tables.
- Utilized: PHP, Laravel, Livewire, Filament, MySQL, Eloquent ORM, Blade, Tailwind CSS, Laravel Fortify, Vite, Git

Education

Mindanao State University - Iligan Institute of Technology **2023 - Present**

- B.S in **Information Technology (Database Major)**, expected June 2027
- Current GPA:** 1.35569 (1x Rizal's Lister, 2x Chancellor's Lister, 3x Dean's Lister)
- Undergraduate Thesis (ongoing):** Keyword-Based Smishing Detection in Text Messages Using Rule-Based Scam Link and Suspicious Keyword Analysis
- Programming & Frameworks:** PHP, Livewire, Laravel, Filament, Javascript, React, Vite,
- Tools & Platforms:** Git, GitHub, Vite, Postman, VS Code
- AI-Assisted Development:** Gemini, Claude, Codex

Certificates

Scrimba - Learn React | React fundamentals, state management, and reusable components

freeCodeCamp - Responsive Web Design | HTML/CSS responsive design certification
